

CONTENTS

Preface.....	vii
Acknowledgements.....	ix
Abbreviations.....	x

1 What is Echo?

1.1 Basic notions.....	1
1.2 Viewing the heart.....	3
1.3 Echo techniques.....	7
1.4 The normal echo.....	13
1.5 Who should have an echo?.....	18
1.6 Murmurs.....	19

2 Valves

2.1 Mitral valve (MV).....	21
2.2 Aortic valve (AV).....	34
2.3 Tricuspid valve (TV).....	44
2.4 Pulmonary valve (PV).....	46

3 Doppler – Velocities and Pressures

3.1 Special uses of Doppler.....	49
3.2 Continuity equation.....	58

4 Heart Failure, Myocardium and Pericardium

4.1 Heart failure.....	68
4.2 Assessment of LV systolic function.....	70
4.3 Coronary artery disease.....	75
4.4 Cardiomyopathies and myocarditis.....	80
4.5 Diastolic function.....	93
4.6 Right heart and lungs.....	106
4.7 Long-axis function.....	113
4.8 Pericardial disease.....	117
4.9 Device therapy for heart failure - cardiac resynchronization therapy.....	126

CONTENTS

5 Transoesophageal, 3-D and Stress Echo and Other Echo Techniques

5.1 Transoesophageal echo.....138
5.2 Stress echo.....150
5.3 Contrast echo.....154
5.4 Three-dimensional (3-D) echo.....157
5.5 Echo in special hospital settings.....163

6 Cardiac Masses, Infection, Congenital Abnormalities and Aorta

6.1 Cardiac masses.....173
6.2 Infection.....176
6.3 Artificial (prosthetic) valves.....182
6.4 Congenital abnormalities.....189
6.5 Aorta.....202

7 Special Situations and Conditions

7.1 Pregnancy.....209
7.2 Rhythm disturbances.....213
7.3 Stroke, TIA and thromboembolism.....217
7.4 Hypertension and LVH.....218
7.5 Breathlessness and peripheral oedema.....222
7.6 Screening and follow-up echo.....222
7.7 Advanced age.....223
7.8 Echo abnormalities in some systemic diseases and conditions.....224
7.9 Individuals with cancer.....229

8 Performing and Reporting an Echo

8.1 Performing an echo.....245
8.2 Reporting an echo.....262

Conclusions.....268
Further reading.....269
Index.....272
