Preface	iv
Acknowledgments	iv
Reviewers	vi

PART I PRINCIPLES AND CONCEPTS

1	Structural Diagnosis and Manipulative Medicine History	2
2	Principles of Structural Diagnosis	12
3	Barrier Concepts in Structural Diagnosis	37
4	The Manipulative Prescription	41
5	Normal Vertebral Motion	49
6	Concepts of Vertebral Motion Dysfunction	63

PART II PRINCIPLES OF TECHNIQUE

7	Principles of Soft-Tissue and Other Peripheral Stimulating Techniques	70
8	Principles of Muscle Energy Technique	97
9	Mobilization With and Without Impulse Technique	103
10	Principles of Indirect Technique	109
11	Principles of Myofascial Release and Integrated Neuromusculoskeletal Technique	148

PART III TECHNIQUE PROCEDURES

12	Cranial Technique	160
13	Cervical Spine Technique	179
14	Thoracic Spine Technique	213
15	Rib Cage Technique	246
16	Lumbar Spine Technique	288
17	Pelvic Girdle Dysfunction	314
18	Upper Extremity Technique	375
19	Lower Extremity Technique	419

PART IV CLINICAL INTEGRATION AND CORRELATION

20	Common Clinical Problems of the Lower Quarter	464
21	Common Clinical Problems of the Thorax, Upper Quarter, and Neck	497
22	Adjunctive Diagnostic Procedures	502

Index	512
