

CONTENTS

PREFACE.....	8
--------------	---

MECHANICAL WAVES

1. OSCILLATIONS AND WAVES.....	12
1.1. Harmonic oscillations.....	13
1.2. Free oscillations.....	16
1.3. Forced oscillations. Resonance.....	17
1.4. Mechanical waves. Wave equation and energy.....	19
2. SOUNDWAVES.....	24
2.1. Sound and its characteristics.....	24
2.2. Reflections and refraction.....	27
2.3. Diffraction.....	28
2.4. Interference.....	29
2.5. Standing waves.....	30
2.6. Doppler effect.....	33
3. HEARING PHYSICS.....	36
3.1. Ear's anatomy.....	36
3.2. Subjective characteristics of sound.....	39
3.3. Binaural hearing. Audiometry.....	41
4. SPEECH. HUMAN VOCAL APPARATUS.....	44
5. INFRASOUND AND ULTRASOUND.....	47
5.1. Infrasound.....	47
5.2. Ultrasound.....	49
5.2.1. Generation of ultrasound waves.	50
5.2.2. Ultrasonic probes.....	52
5.2.3. Interaction of ultrasound with tissues.....	54
5.2.4. Application of Ultrasound and Sound in medicine.....	56

FLUID PHYSICS

6. LIQUIDS AND THEIR CHARACTERISTICS.....	64
6.1. Hydrostatic of liquids.....	65
6.2. Flow of liquids.....	68
6.2.1. Equation of continuity.....	68
6.2.2. Bernoulli's Equation and its application.....	69

6.2.3. Fluids internal friction. Liquid viscosity.....	73
6.2.4. Types of liquid flow. Reynolds number.....	75
6.2.5. The flow of real fluids. Equation of Poiseuille and Hagen.....	77
6.2.6. Liquid flow in capillaries.....	77
6.2.7. The motion of bodies in a viscous fluid. Stokes' law. The mobility.....	78
6.2.8. Methods for measuring the viscosity of liquids. Viscometry.....	80
6.3. Blood Physics.....	83
6.3.1. Blood flow in the blood vessels.....	83
6.3.2. Blood pressure measurement. Physical basics.....	85
6.3.3. Blood viscosity.....	88
6.3.4. Sedimentation. Determination of erythrocyte sedimentation rate (ESR).....	90

OPTICS

7. NATURE OF LIGHT. REFRACTION OF LIGHT. DISPERSION.....	97
7.1. Nature of light.....	97
7.2. Absolute refractive index. Dispersion.....	98
7.3. Law of Refraction. Snell's Law.....	100
7.4. Total Internal Reflection.....	101
8. PHYSICS OF VISION. LENSES.....	104
8.1. Lens.....	104
8.1.1. Image formation by a single lens.....	106
8.1.2. Image formation by the lens system.....	109
8.1.3. Thin lens formula.....	110
8.1.4. Lens power.....	111
8.1.5. Linear and angular magnification.....	111
8.2. The optical system of the eye.....	112
8.2.1. Resolution of the eye and visual acuity.....	113
8.2.2. Accommodation and refractive power of the eye.....	114
9. MICROSCOPE.....	117
9.1. Microscope magnification.....	117
9.2. Microscope resolution.....	119
10. POLARIMETRY.....	122
10.1. Natural and polarized light.....	122
10.2. Light polarization.....	123
10.3. Malus's Law.....	125
10.4. Optically active substances. Rotation of the polarization plane.....	126

IONIZING RADIATION

11. RADIOACTIVITY.....	132
11.1. Nuclear structure.....	132
11.2. Nuclear mass and binding energy.....	134
11.3. The concept of radioactivity.....	135
11.4. Radioactive decay law.....	138
12. X-RAYS.....	142
12.1. X-rays nature and characteristics.....	142
12.2. Thermoelectronic emission.....	143
12.3. Bremsstrahlung X-ray (braking radiation).....	144
12.4. Characteristic X-ray radiation.....	147
13. INTERACTION OF RADIATION WITH MATTER.....	150
14. DOSES OF IONISING RADIATION.....	157
15. USE OF IONISING RADIATION IN MEDICINE.....	161
15.1. X-rays in medicine.....	161
15.1.1. X-ray diagnostics.....	162
15.1.1.1. Radiography.....	163
15.1.1.2. Computed tomography (CT).....	163
15.1.2. X-ray therapy.....	165
15.2. Radioactive materials in medicine.....	166
15.2.1. Diagnostic methods using radioisotopes.....	166
15.2.1.1. Radioisotope imaging.....	167
15.2.1.2. Nuclear emission tomography.....	168
15.3. Ionizing radiation in therapy.....	171
15.3.1. External radiotherapy.....	171
15.3.2. Brachytherapy.....	172
15.3.3. Internal radiotherapy with liquid isotopes.....	173

LABORATORY WORKS

16. LABORATORY WORKS.....	177
Laboratory work 1 : Calculating the frequency of oscillations.....	178
Laboratory work 2: Determination of the dynamic coefficient in different liquids.....	181
Laboratory work 3: Determining of the dynamic viscosity of a liquid using the Stokes method.....	183
Laboratory work 4: Blood pressure measurement.....	185

Laboratory work 5: Dependence of the refraction index of the solution on the concentration.....	189
Laboratory work 6: Determination of the focal length.....	193
Laboratory work 7: Measurement of small objects with the brightfield microscope.....	196
Laboratory work 8: Polarimeter.....	199
Laboratory work 9: Radioactivity.....	203
LITERATURE.....	206
