

CONTENTS

- 1 Introduction, 1
 - 2 Ultrasound and B-Mode Imaging, 5
 - 3 Doppler Ultrasound, 33
 - 4 Color Flow Imaging, 47
 - 5 Blood Flow and Its Appearance on Color Flow Imaging, 63
 - 6 Factors That Influence the Doppler Spectrum, 79
 - 7 Approach to Scanning, Operational Policies, and Safety, 95
 - 8 Ultrasound Assessment of the Extracranial Cerebral Circulation, 109
 - 9 Duplex Assessment of Lower-Limb Arterial Disease, 147
 - 10 Duplex Assessment of Upper-Limb Arterial Disease, 179
 - 11 Duplex Assessment of Aneurysms and Endovascular Repair, 193
 - 12 Vascular Ultrasound of Abdominal Aortic Branches, 217
 - 13 Anatomy of the Lower-Limb Venous System and Assessment of Venous Insufficiency, 235
 - 14 Duplex Assessment of Deep Venous Thrombosis and Upper-Limb Venous Disorders, 277
 - 15 Graft Surveillance and Preoperative Vein Mapping for Bypass Surgery, 303
 - 16 Ultrasound of Hemodialysis Access, 323
 - 17 Transcranial Doppler Ultrasound, 341
- Appendix A Decibel Scale, 355
Appendix B Sensitivity and Specificity, 357
Appendix C Summary of Scanner Controls, 359
References, 367
